THE above planting was furnished by us, and many of the largest plantations in the East have been supplied from our stock. Our extensive importations of Hybrid Rhododendrons embrace the best types suitable for American culture, in addition to which we have many thousands growing at our own nurseries. A border or group of Rhododendrons give a glorious color effect and a pleasing finish to any grounds whether large or small. Being an evergreen, the plants furnish a mass of green throughout the year.

Rhododendron Maximum and Kalmia Latifolia

For Border and Woodland Planting

THESE plants, collected from their native fields, are offered in car-load lots at very low prices. An ugly strip of woodland, or a woodland border, can be made an attractive landscape feature by the judicious planting of these two types. They lend a pleasing color scheme when in bloom and a mass of green after they have finished blooming both Winter and Summer.

Kalmia latifolia. Mountain Laurel

Our plants are collected in the mountains of Western Pennsylvania, by trained men who are experts in this work. Early orders for this stock are advisable, as considerable time is given, and the closest attention, to proper selection and grading. For a complete border planting it is customary to include an assortment of sizes from two to four feet high, a car containing about 250 plants.

Price per car, \$115.00, f. o. b. collecting grounds.

We shall be pleased to submit special prices for particular sizes or quantity.

ORIENTAL PLANES AND NORWAY MAPLES

These two types stand alone in importance for ornamental planting, or for street or avenue planting. Photographs shown are from blocks growing in our nurseries. Better trees cannot be grown, and we offer them in large quantities and in all sizes.

Thousands of Oriental Planes Like These

Oriental Planes

will thrive under conditions fatal to most trees. They are extremely hardy, of fairly rapid growth, with well-balanced and symmetrical form.

IN submitting this brief list for the coming Spring, we wish to call your attention to a few of the many specialties which we have to offer. If you have not received a copy of our 72-page Descriptive Guide Book, or have mislaid it, write us, and we shall be pleased to send you another copy. We have over six hundred acres under cultivation, and that we have served our patrons well is evidenced by the fact that our Bloodgood Department, established in 1790, has merited the public patronage for 124 years. Our F. & F. Nurseries have also been established many years, and it is our constant aim to maintain, and, indeed, to improve, if possible, our facilities and our organization.

For extensive improvements, requiring large list of planting stock, we shall be pleased to submit special quotations. We wish to assure our patrons of our appreciation for past favors, and our best continued attention.
